# Full-stask web developer EMAIL: ostaphuba@gmail.com

Ostap Hyba

Languages

## **Frameworks**

Python, PHP, Javascript

## jQuery, Wordpress

**Technologies** 

REST, SOAP, GraphQI, web scraping, Celery, RabbitMQ, Redis

Django, Flask, Tornado, Twisted,

Laravel, Symfony, React.js, Angular2+,

# Postgress, MySQL, MongoDB

DB

Industry: Business services

## e **PREVIOUS PROJECTS**

**Experienc** 

Work

### Platform for managing and analyzing user health data from their watches.

**RESPONSIBILITIES** 

o deploying

**TECHNOLOGIES** 

PROJECT #2

**RESPONSIBILITIES** 

scratch

PROJECT #1

**ABOUT** 

Adding new services on backend(for o collecting atmospheric pressure, UV

# PHP, Symfony, MySQL, React.js

and sleep insights data)

# Industry: Business services

**ABOUT** 

vehicles.

Product for managing selling/buying

connecting client-app to server by websocket connectinon

creating backend and frontend from

**TECHNOLOGIES** 

o connecting backend to firebase

o deploying and testing

Python, Django, Postgress, Tornado,

Firebase, React.js, sock.js, HTML, CSS3,

### PROJECT #3 **ABOUT**

**RESPONSIBILITIES** 

testing

Apollo

**TECHNOLOGIES** 

**SASS** 

Project created to helping authors write books faster with better grammar, organize their thoughts

and find their inspiration.

Industry: Media and entertainment

implementing GraphQl, celery workers, html to pdf/docx/mobi converter o bug fixing on frontend deploying and performance/load

Developing server-side arhitecture

Python, Django, Celery, GraphQl(graphene), Postgress, Docker, Angular6, HTML, CSS3, SCSS,

# PROJECT #4 **ABOUT**

This extension created for sales

conversations. When user are on email page, content from email will

Industry: Business services

managers to help in theirs

### send to backend algorithm and after user get some help and tips. This help data include: sentiment score and

other tips how to improve conversation, what would be the best answer, which words should be

excluded and so on.

**RESPONSIBILITIES** creating backend with user auth and analyzing algorithm creaitng chrome extension with google mail parser deploying and testing **TECHNOLOGIES** 

Python, Django, Django-restframeworks, Postgress, React.js,

Industry: Media and entertainment

jQuery, HTML, CSS3, SCSS

## It is a platform for detecting quantity of truth in articles from different

**RESPONSIBILITIES** 

PROJECT #5

**ABOUT** 

creating web scrapper for getting news from sources

sources.

- adding celery tasks that periodically collect news and delete old articles o implementing D3 graphs on frontend
- **TECHNOLOGIES**

Python, Django, Celery, Redis,

o deploying and continuous integration

MongoDB, Postgress, React.js, HTML, CSS3, SASS

## **ABOUT** Industry: Finance & Banking

PROJECT #6

Online Courier Comparison service that instantly compares the Cheapest

Couriers, Same Day Couriers, Next Day Couriers or the most reliable and recommended by other users. **RESPONSIBILITIES** 

Connecting new frontend to backend

- adding new values to existing models o deploying
- **TECHNOLOGIES** PHP, Laravel, MySQL, JS, HTML, CSS3, LESS

LVIV IT SCHOOL

2015 (4 mounth)

**Mechanics and Mathematics** 

ACADEMIC **CAREER** 

Lviv national university of Ivan Franko 2008-2012
